

Practice Task 2

Practicing CSS

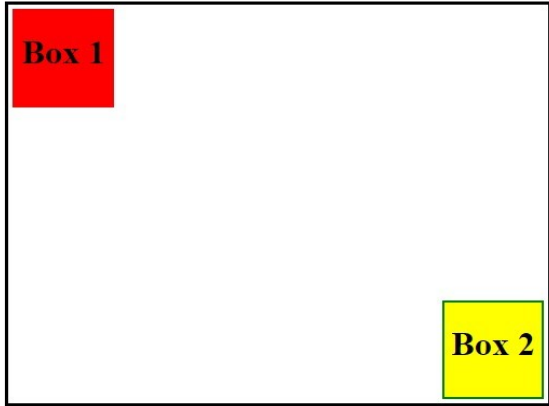

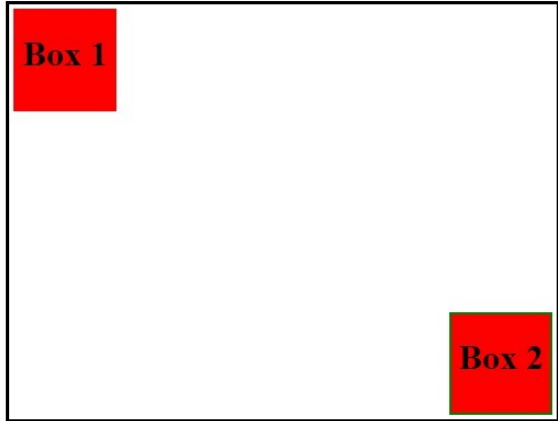

Objective:

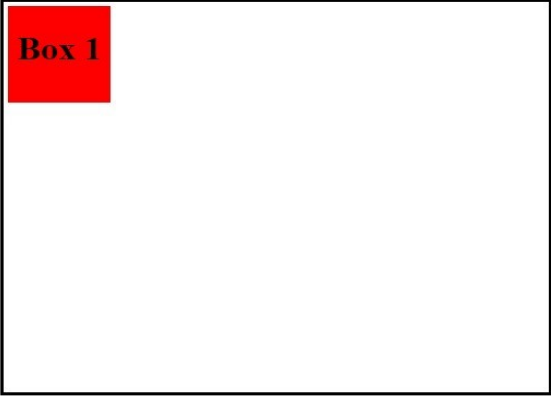

- Learning the concepts of CSS
- Practice to add external CSS in html files (You may use embedded CSS as well along with external CSS)

Task:

Write down HTML to create a web page and the boxes. And do the following task.

Make a large rectangular box and create 2 small rectangular boxes as shown in the image below. When the user hover over box 1, the color of box 2 changes to red whereas when the user hover over box 2 it disappears. (5 marks)

Scenario	
Original Boxes	
Output: When user hover over box 1	

<p>Output: When user hover over box 2</p>	
---	--

Submission:

- At Moodle 10 minutes before class ends.
- No late submissions will be entertained.
- Submissions in emails NOT allowed and will NOT be marked.
