

## Practice Task 1

### Practicing HTML and CSS

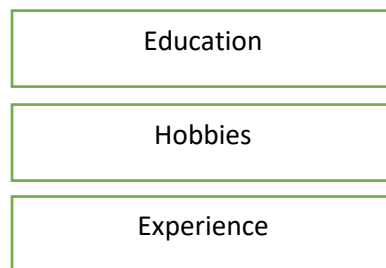

#### Objective:

- Learning the concepts of HTML and CSS
- Practice to add external CSS in html files (You may use embedded CSS as well along with external CSS)

#### Task:

Write down HTML to create a web page about yourself. And do the following tasks.

1. Write 2-3 **paragraphs** on myself (education, likes, dislikes, hobbies etc. You may add more of your choice). Apply all **3-text transformation** to the headings of these paragraphs using classes.
2. Make a **button** with the text “**Click Me**”. The background color should be “**dodgerblue**”, text color should be “**white**”. You also need to make **diagonally opposite** corners **rounded**. On hover the background color should be **transparent** with a border of **black** and the **non-rounded** corners should be **rounded** while the previously rounded corners should go back to the they were. Make sure the hover transition is smooth.
3. Add a background Image (**fixed**).
4. Add another image (**repeated horizontally**).
5. Create **3 hyperlinks** to your website pages. The resulting output should like the one shown below:

#### Submission:

- At Moodle 10 minutes before class ends.
- No late submissions will be entertained.
- Submissions in emails NOT allowed and will NOT be marked.
